PSI Assigment 2 Report

Made by Pair 5 at Group 1451:

We have deployed our web page on Heroku at https://tango-rango.herokuapp.com

You also have the files of our git repository at the folder "", you can check that all the test pass successfully. You will need to export our private key, and maybe the settings variable, to do that use:
export TANGO_SECRET_KEY='6882w5y#8x!vlzs=m%vjjtlv8&)e&a$cp2ahdwnh9rutig$&a$'
export DJANGO_SETTINGS_MODULE='P2_5.settings'

This is the result of the test coverage, as you can see we get a 89% coverage.

```
(psi)                          rango]$ coverage report -m -i
Name                                 Stmts   Miss  Cover   Missing
-----------------------------------------------------------------
__init__.py                              0      0   100%

TOTAL                                  228     26    89%
```

We have discuss the django architecture on the "Django.odp" file.

Thank you for your attention.
